## **DETAILED ACTION**

## **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Donald Nissen on August 29, 2005.

The application has been amended as follows:

- a) Claim 1, line 9: "widths." has been replaced with widths, and wherein the reduced effective cross-sectional area comprises a porous material, posts, or columns disposed in the microchannel. –
- b) Claims 3 and 4 have been cancelled.
- c) Claim 19, line 10: "widths." has been replaced with widths, and wherein the reduced effective cross-sectional area comprises a porous material, posts, or columns disposed in the microchannel. –

Application/Control Number: 09/669,862 Page 3

Art Unit: 1753

d) Claim 22 has been cancelled.

e) Claim 28, line 12: "widths." has been replaced with - widths, and wherein the

step of modifying includes reducing the geometric cross-sectional area with posts

or columns, filling the microchannel with a porous material, or packing the

microchannel with structured particles. -

f) Claim 29 has been cancelled.

g) Claim 30, line 5: "long." has been replaced with - long, and wherein the

reduced effective cross-sectional area comprises a porous material, posts, or

columns disposed in the microchannel. -

h) Claim 33 has been cancelled.

## Allowable Subject Matter

- 2. Claims 1, 19, 21, 23, 28, 30, and 32 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

Independent claims 1, 19, and 30 have been amended to require the reduced

Application/Control Number: 09/669,862

Art Unit: 1753

effective cross-sectional area to comprise a porous material, posts, or columns disposed in the microchannel. Independent claim 28 has been amended to require the step of modifying to include reducing the geometric cross-sectional area with posts or columns, filling the microchannel with a porous material, or packing the microchannel with structured particles. Griffiths reduces the effective cross-sectional area of the microchannel proximate the junction by narrowing the microchannel width to form a constriction with constricting and expanding portions. See Figure 12, for example. Sundberg et al. (US 6,090,251) reduces the effective cross-sectional area of the microchannel proximate the junction by narrowing the microchannel with a raised bottom microchannel surface portion. See Figures 7-9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to ALEX NOGUEROLA whose telephone number is (571) 272-1343. The examiner can normally be reached on M-F 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, NAM NGUYEN can be reached on (571) 272-1342. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
